

Cottonwood Suitability on the Yampa River

Steamboat Springs, CO

Where is the best place to plant cottonwood trees along the Yampa River?

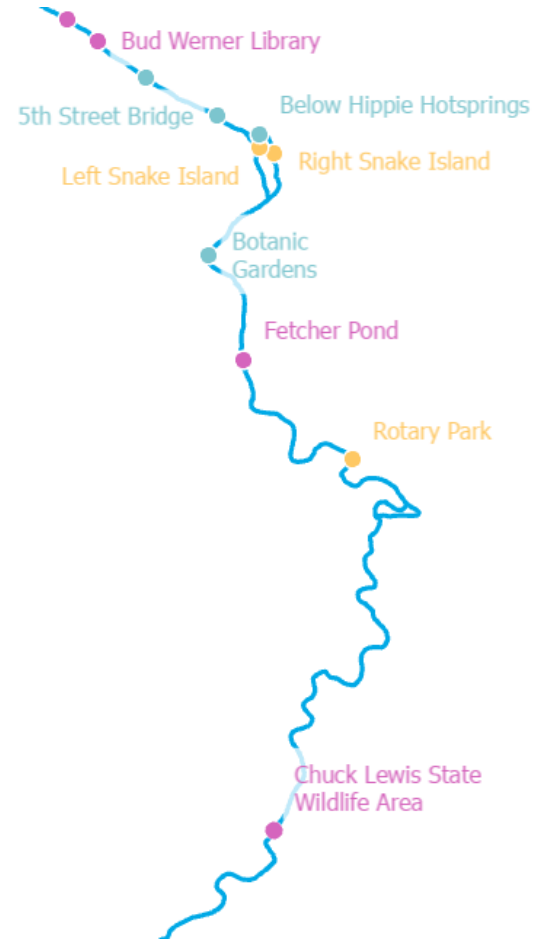

Cottonwood trees help!

- Reduce the water temperature -> combat climate change
- Provide wildlife habitat -> biodiversity
- Sequester carbon
- Reinforce soil -> less erosion

Geoprocessing Tools:

- 1) Feature Class - line
- 2) XY Table to Point
- 3) Clip

3) Clip

Other Layers:

a) Streams & Rivers

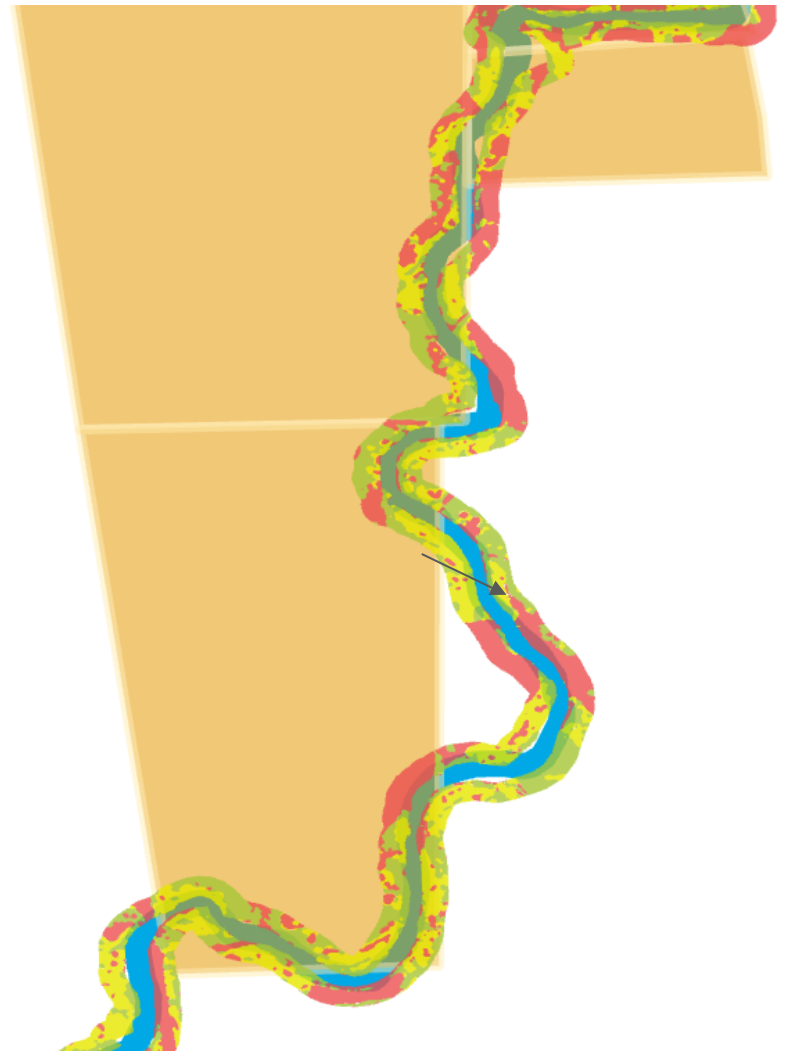

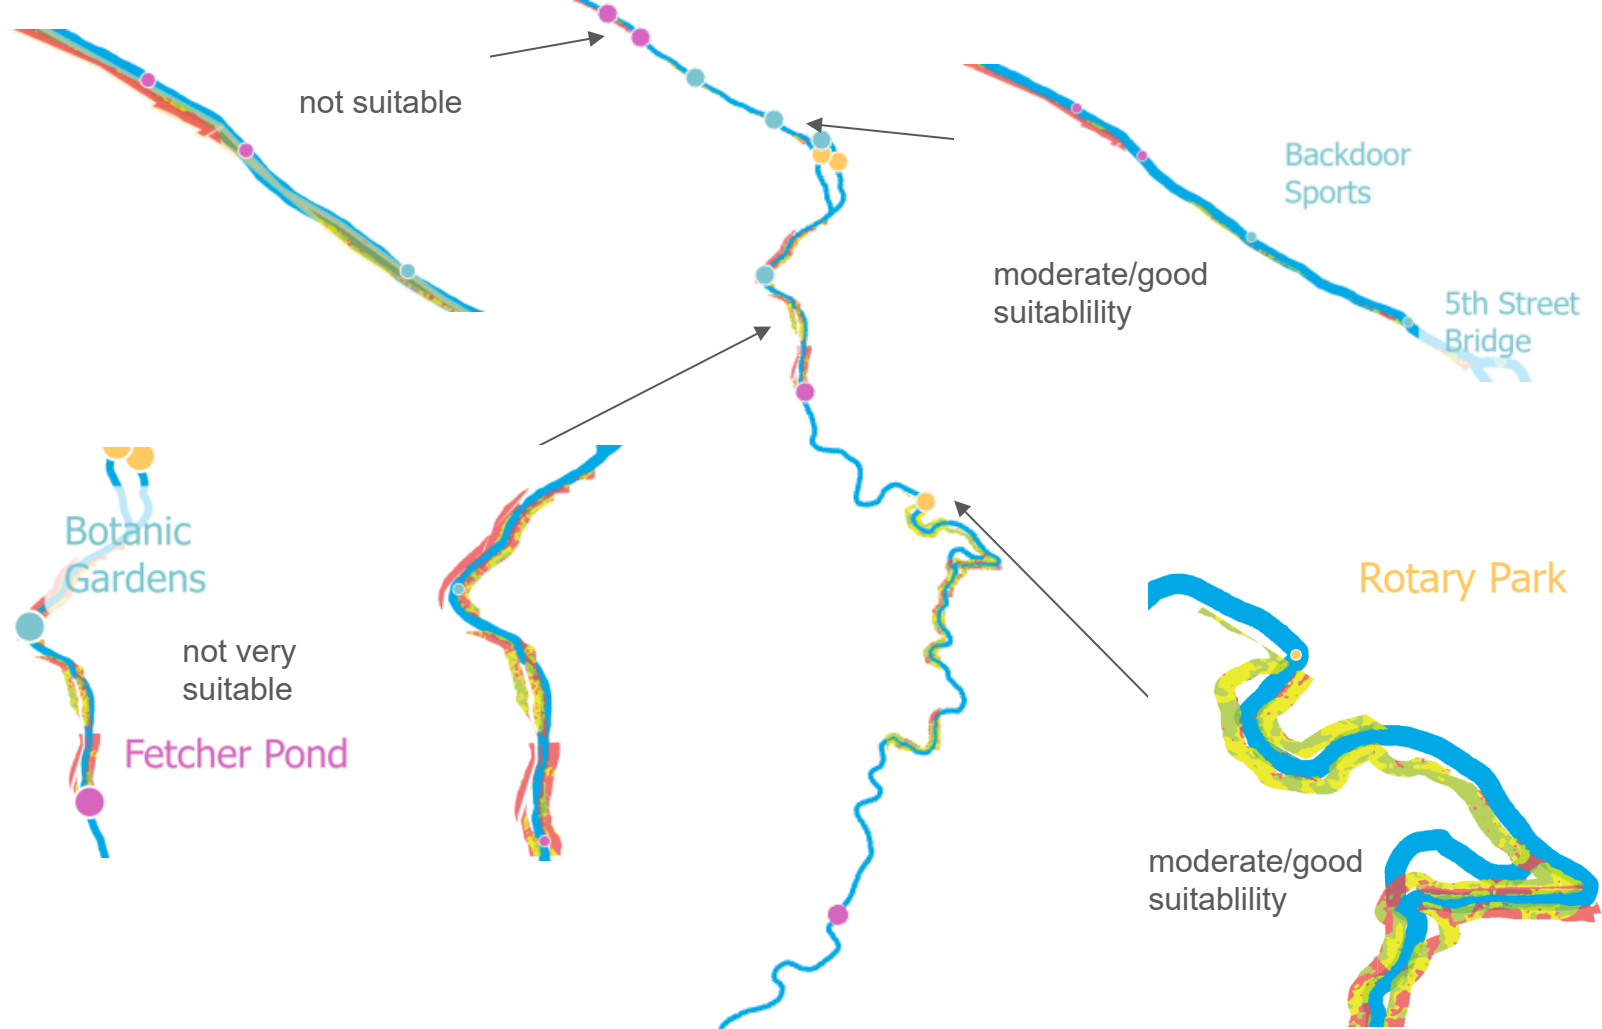

b) Transportation

“Yampa and Elk Cottonwood Suitability”
layer from cloud - by Nicole at YVSC
(3/7/22)

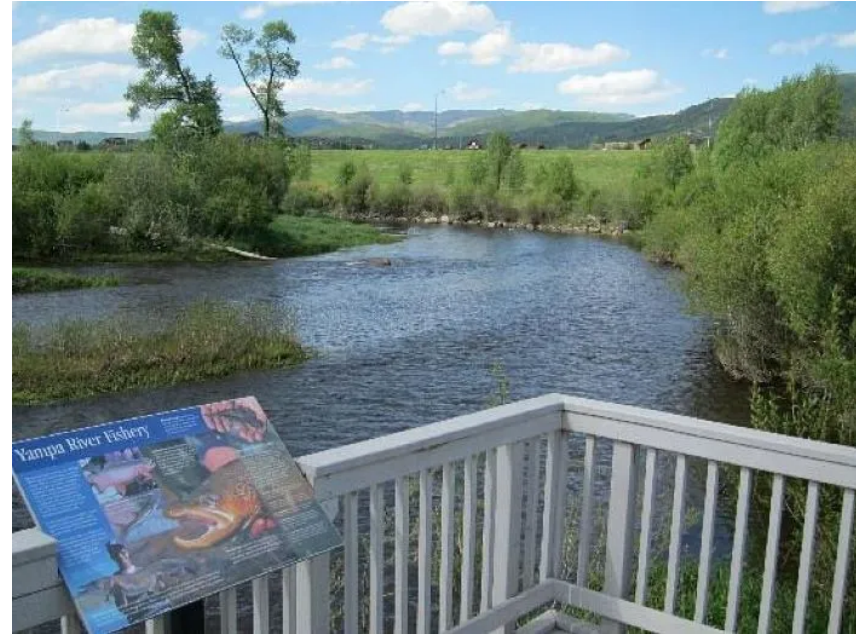

Includes City Parcels and
Suitability layers

Conclusion

We should plant more cottonwood trees at Rotary Park

Steps

Export google earth file to .kml

Insert into ArcGIS - wont let me change the symbology, so I am going to make new points

Make a spreadsheet for all of the coordinates in Exel

Export as a .csv

Insert into ArcGIS

Use the geoprocessing tool "XY Table to Point"

Coordinate system "GCS_WGS_1984"

Changed symbology

Added labels by adding a field in the attribute table

Insert Yampa River line that I created in Lab_13

Insert "Yampa and Elk Cottonwood Suitability" layer from cloud - by Nicole at YVSC (3/7/22)

Includes City Parcels and Suitability layers

Insert "Top_Yampa_Sites" by Nicole at YVSC (12/20/21)

Create a layout

Add north arrow, scale bar, and legend

Convert to graphics to edit legend
